## PRODUCT FEATURES

### Bright RED LED Display

Ensures high visibility in airport environments, providing clear and accurate weight readings.

### Standard Addition and Subtraction Software

Facilitates precise weight calculations for efficient check-in and baggage handling.

### Tare Option Through Display

Allows easy deduction of container or additional weight, ensuring correct weight readings.

### Additional Slaves Option

Supports multiple display units, enabling integration with airport luggage weighing displays and airline check-in counters.

### High-Accuracy Baggage Weighing Display

Delivers precise weight measurements, improving baggage processing efficiency.

### Automated Baggage Weighing System

Reduces manual intervention and speeds up check-in operations.

### Travel and Logistics Weighing Systems

Streamlines baggage handling in airports, railway stations, and cargo terminals.

### Industries & Applications

Ashwek Automation's Baggage Weighing Display is designed for seamless integration into aviation and logistics operations. It enhances airport baggage handling systems, ensures precise airline check-in weighing, and supports commercial baggage weighing solutions for logistics hubs.
